

## Email Inspector Pro Features

### 1 Reporting Options

- Daily or Weekly Reports are received in your email for review.
- Reports include the number of messages received in each classification, from each country, and messages flagged as viruses.
- Reports generated are helpful in setting optimum e-mail security settings and evaluating service effectiveness.
- Reports can also be maximized to increase resolution and detail.

### 2 Filtering Options

- The administrator or user can set filter aggressiveness.
- Filters include Get Rich Quick, Gambling, Sexual, Pharmaceutical, and Advertisement. You can set preferences to allow all, lenient, no preference, aggressive, or block all.
- Block languages and countries.

### 3 Message Options

#### PREVIEW - FORWARD - DELIVER

- View messages in your own personal quarantine and decide to preview, deliver or forward the e-mail.
- Messages stay in the quarantine for 30 days.
- The Quarantine Summary allows the user to set the frequency of notices, time of day, day of week and summary style.

## Advantages

- Reduces bandwidth cost by filtering and scanning e-mails on our servers.
- Reduces memory usage on your internal servers making more memory available for other applications.
- Email Inspector Pro relieves the stress of filtering thousands of unwanted e-mails on internal mail servers.
- External servers filter e-mails, so spam and viruses never reach your internal environment.
- Options are available to preview, deliver, or forward e-mails, so you will never lose prospective business.
- Email Inspector Pro is less expensive than other filtering programs.
- IT Administrators or users can choose their settings.

## Cost Benefit Analysis

- No hardware required.
- No personnel required to monitor.
- Increase staff productivity by reducing their time reviewing e-mails.

## SPAM

Spam e-mails are e-mails that you didn't sign up for or contain marketing and unsolicited content. Spam can be very harmful to your computer.

## VIRUSES

Viruses can be transmitted through e-mail. A virus can corrupt data, delete data or use your e-mail program to spread itself to other computers. Viruses can be disguised as attachments in your e-mails.

## MALWARE

Malware, or malicious software, is any kind of unwanted software that is installed without competent knowledge. It can appear in the form of codes, scripts, active content, and other software. Email Inspector Pro will trap malware before being delivered to your local e-mail.

## PHISHING

Phishing e-mails contain spelling errors and bad grammar. They also contain threats and can spoof popular websites or companies. The Email Inspector Pro recognizes this type of e-mail content before they reach your computer.
